

EPISODE 11 • STUDY NOTES

Compact Layouts & the Highlights Panel

A quick, easy-to-revise breakdown of the video — with tables, diagrams, and a step-by-step build guide.

1 Introduction

0:00 – 0:30

After Record Types, this episode covers another key customization feature: **Compact Layouts**.

Covered today: What a Compact Layout is • Why we need it • The Highlights Panel • Creating & assigning a Compact Layout

2 What is a Compact Layout?

0:30 – 2:00

When you open a student's profile, you want key details — Name, Roll Number, Email, Phone — instantly, without scrolling. That's exactly what a Compact Layout controls.

IN SIMPLE WORDS

A Compact Layout decides which important fields appear first when you open a record

3 Why Do We Need It?

2:00 – 3:00

An Account record might have 50 fields — but users usually only need a few at a glance. Compact Layouts surface just the most useful fields up top, making records faster to scan.

4 What is the Highlights Panel?

3:00 – 4:00

The **Highlights Panel** sits at the very top of a record page. It shows:

Highlights Panel Shows	Example
Record Name	Rahul Sharma
Compact Layout Fields	Roll Number, Email, Phone, Status
Quick Actions	Edit, Delete, Clone

Update the Compact Layout, and the Highlights Panel refreshes automatically to match.

5 Practical Demo

4:00 – 7:00

Creating a Compact Layout for the **Student** object:

- 1 Open the **Student** Object → go to **Compact Layouts**.
- 2 Click **New** and name it **Student Compact Layout**.
- 3 Select the fields to display (see below).
- 4 Click **Save**.
- 5 Go to **Compact Layout Assignment** and set it as **Primary**.

Fields selected for the Highlights Panel:

Student Name

Roll Number

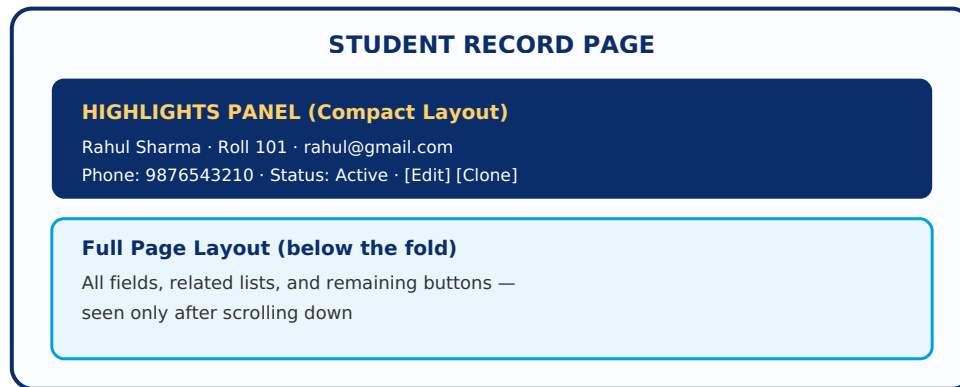

Email

Phone Number

Status

Result: Open any Student record — the Highlights Panel now shows exactly these fields at the top.

6 Record Page Anatomy — Recap Diagram

Compact Layout = what's visible instantly. Page Layout = everything else, below the fold.

7 Episode Summary 7:00 – 7:30

- ✓ Compact Layout = controls the **Highlights Panel** at the top of a record
- ✓ Why it matters — quick access to key info without scrolling
- ✓ Highlights Panel = Record Name + Compact Layout fields + Quick Actions
- ✓ How to create and assign a Compact Layout

Coming up next: Lightning Record Pages — fully customizing a record page layout using the *Lightning App Builder*.
